

Two Tiedowns and a Collet

The AS-3916 antenna is feeling a little slighted. Its cousin, the AS-1729 antenna, has its own TM, but the AS-3916 doesn't.

That shouldn't bother you, though. You can find repair parts for the AS-3916 in the SINCGARS manual, TM 11-5820-890-20P.

Check out Fig 108A. It has a couple of items you're probably looking for. Item 8 is the wire-rope tiedown assembly, NSN 4010-01-381-1581. Item 15 is the collet—locking nut—that holds the antenna on its base. It's NSN 1560-01-435-8079.

Tiedown and collet

And just so the AS-1729 doesn't feel slighted now, we'll tell you that its fiber-rope tiedown assembly is NSN 4020-00-908-6416. It's Item 6 of Fig 1 in TM 11-5985-262-24P.
